

**NEW FOR '08**

# MERCURY Rigging™

## FINGER-RELEASE 4000 PANEL CONTROL IN CHROME

Multi-tasking made easy! The new Finger-Release Panel Control allows you to shift and trim simultaneously to provide easier and improved control of your boat. This finger-release panel mount control allows you to remain fully aware of your surroundings during close quarter maneuvers and docking and trailering operations. Rig your boat with performance cables and our new 4000 Panel Control and experience improved shifting efforts by as much as 30% making this combination one of the finest mechanical systems available.

## MECHANICAL SHIFTING & THROTTLE CABLES

- Full complement 16-lay cables
- Exceeds Mercury's rigid performance standards
- Armor-wrapped Stainless Steel around 7-wire Stainless Steel inner core
- Brass, nickel plate ends (Premium) or Stainless Steel (Platinum) for improved corrosion protection
- Premium cables are ideal for high quality installations that require more than 18 feet and have multiple bends or sharp corners in the rigging process
- Platinum cables are ideal for the most demanding rigging installations which require extra strength and superior corrosion resistance

OUTBOARD MODEL:  
P/N 8M0030550

STERNDRIVE MODEL:  
P/N 8M0030551

**WHAT NOT TO USE...** Flimsy 6-wire, partial complement cables can't come close to the performance of the above cables.
